

*Regional Gas Initiative North West:
8th February 2007*

*Workshop on Day Ahead Capacity
Auctions*

Preliminary Views of Eurogas on CBCA

- Eurogas system users support the initiative on CBCA and welcome that the TSOs are active on CBCA's structuring and elements
- A **pilot** system should be introduced **as soon as possible**
- It is essential also to agree a **review process**, that will monitor the results, to see if the pilot is delivering

- It makes sense to keep the pilot simple in terms of production and process, and therefore the TSOs' proposal is acceptable at this stage
- Depending on the outcome of the review process, it might be possible to think later about developing other product features
